

Champagne Massage II™

5 Spray Hand Showers with Pause Setting and Power Boost

Experience the Sensation of the **Champagne Massage II** showers that offer 5 spray patterns, 3 unique settings and 2 combinations.

the individual shower sprays are:

Soft Champagne Bubbles, 10 bubble jets for softer gentler flow
Hard Shower Spray, 39 jets provide 2 layers of hard full body spray

Fast Pulsating Massage 6 alternating jets provide massaging feel

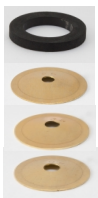

Plus **2 Combination sprays** that combine the hard shower spray with either the pulsating massage or champagne aerated streams. And a **Pause Setting** which cuts the flow to a trickle, great for washing the dog or helping someone in the shower.

2.5 GPM Maximum flow rate at 80 psi, complies with federal codes and includes the **Power Boost Advantage** for improved performance in lower water pressure areas.

Chrome and brush nickel hand showers include the **Bungy** ° stainless steel stretch shower hose that stretches for greater tub area coverage!

The Power Boost Advantage

All **Champagne Massage II** Hand Shower Kits include our *Power Boost Advantage*, a flow regulating system that allows the user to easily adjust the force and flow rate of their shower at their water pressure. The National Energy Policy Act of 1992 mandated all showers sold in the U.S. could not exceed 2.5 Gallons Per Minute (GPM) at 80 psi so we developed *Power Boost* to ensure those with lower water pressure could still get a good, invigorating shower spray. This consists of a series of 3 brass flow restricting discs, each with a slightly larger thru hole, which allows for slightly greater flow with much more force. This allows those with lower pressure to still get a good shower without wasting water or energy!
