

U.S. Made 1.8 GPM
SaverShower Plus™
Solid Brass High Velocity Shower Heads

Great Savings Plus a Great Shower!

Creates a conical spray pattern of perfectly sized droplets for a forceful and invigorating shower feel, not needle sharp or too misty. Great rinsing force while saving water and energy.

Pressure compensating 1.8 GPM Max flow regulator

Our new, improved pressure compensating flow regulators maintain a consistent flow rate over a range of water pressures, lowering the flow rate only slightly from 80 to 30 psi.

Made in the U.S.A. of solid brass and chrome plated

All components are made in the USA, All brass components are machined, plated and assembled in the U.S.A. All rubber sealing and compensating components are made in the USA.

Optional Push Button Control

Allows for easy adjustment of shower force or to cut the flow to a trickle for greater savings while shampooing, etc. Trickle maintains temperature of water to avoid possible scalding situation.

Vandal Proof Option

Stainless steel set screws installed in both the coupling and/or nozzle that make it harder for some one to remove the shower or take it apart. After installing shower head on shower arm and testing for leaks, simply tighten the set screws with the special allen wrench provided to make it much more difficult to remove or take apart.

How it works

As water enters the shower head it is funnelled through the flow regulator, which speeds the flow of water like putting your thumb over the end of a garden hose. This high velocity, high energy water then hits the brass disc and is dispersed sideways through the 10 perfectly sized holes in the disc. Still traveling at a high speed, the 10 water jets then hit the inside of the nozzle, breaking the flow into droplets which maintain their energy and speed while being forced out in a concise, conical spray pattern resulting a truly invigorating, water saving shower!

Lifetime Warranty

We guarantee this product will last you forever, if anything ever goes wrong with it simply return to us for repair or a replacement.

USP1C	Std. SaverShower Plus, 1.8 GPM, chrome	19.99
USP1C-N	Std. SaverShower Plus, 1.8 GPM, brushed nickel	29.99
USP1VP	Std. SaverShower Plus, 1.8 GPM, vandal proof	23.99
USP2C	Dlx. SaverShower Plus w/ push button, 1.8 GPM, chrome	28.99
USP2C-N	Dlx. SaverShower Plus w/ push button, brushed nickel	38.99

Flow Rate Chart

psi*	30	40	50	60	70	80
gpm	1.5	1.6	1.7	1.7	1.8	1.8

* psi is water flow pressure, tested using ANSI test methods
Per ASME 112.18.1M Specifications
