

The Blaster™

48 Spray Jet Fixed Spray Showers

Experience the Sensation

Extra Wide Shower Spray, 48 spray jets provide 3 layers of streams for a wide and full body shower spray, very similar to a Pan Head type shower but from a smaller nozzle.

Soft Spray Jets are easy to clean, simply rub the spray jets with water flow through to eliminate scale or lime build up

Available as wall mount or hand held shower

The hand held version includes a 59" Bungy stainless steel soft and flexible shower hose, stretches to over 80" long.

Rated at 2.5 GPM maximum flow rate at 80 psi, complies with federal codes, not legal for sale in CA or CO

Power Boost Advantage for improved performance in low pressure, insuring a good shower at any pressure.

The Power Boost Advantage

The **Blaster** Shower Heads include our *Power Boost Advantage*, a simple flow regulating system made of 3 brass discs and a sealing/retaining washer that fit neatly in the neck of the shower head or swivel arm bracket for the hand held version. This allows you to easily adjust the force and flow rate of the shower depending on your water pressure. Federal codes require all showers sold in the U.S. use no more than 2.5 GPM at 80 psi - flowing. The lower your water pressure the lower your flow rate, so with Power Boost you can still get a good, enjoyable shower flow even if you have low water pressure.
