

Rainbo Massage™

7 Spray Showers with Power Boost

A Feel Good Shower Experience

The most invigorating, feel good shower you may ever take! The **Rainbo' Massage Showers** provide 7 different spray settings that include four individual shower sprays and three combination flows to ensure a great feeling shower for everyone in the family.

The 4 individual shower spray settings are:

Hard Shower Spray, 40 rub clean silicone jets provide a hard 2 layer full body spray

Softer Bubble flow, 10 aerating bubble jets give a drenching, yet softer flow with great rinsing action.

Fast Pulsating Massage action with 8 alternating jets, great for massaging tired, aching muscles

Relaxing Mist setting creates steam sauna in your shower or cooling mist for hot summer days.

Also provides 3 combination sprays combining the forceful shower spray with either the Bubble Streams, the Fast Pulsating flow, or the Relaxing Mist settings.

The Power Boost Advantage

All **Rainbo Massage** Shower Heads and Hand Shower Kits include our Power Boost Advantage, a flow regulating system that allows the user with less than 80 psi water pressure to adjust the force, and flow rate, of the shower insuring a good quality shower at any water pressure. This consists of a series of 3 brass flow restricting discs, each with a slightly larger thru hole for maximum comfort in lower water pressure situations. Designed to provide a strong 2.5 GPM shower at 80 psi, maximum allowed by Federal Codes, this allows those with lower pressure to still get a good shower without wasting water or energy!.
